

BEAT IT! BEAT IT! CHEVROLET

The mechanical construction of the Chevrolet is equal to that of any \$1000 to \$1200 machine on the market, and it rides equal to any car at any price.

Some of the special features of this car are the bronze bearings backed with babbit lining, which makes them stronger and they will not burn out. The crank shaft is 1 7/8 inches while other small cars are only 1 1/4. It is also three bearing. It has a three-quarter floating rear axle and a clutch collar that has them all beaten. There are three speeds forward and reverse and it can go two miles or fifty on high, which makes it an exceptional hill climber. The engine test is 22 on A. L. A. M. rating and 33 on brake test. The car weighs 1700 pounds and has 102-inch wheel base. All these advantages you get in the Chevrolet; but come in and let us demonstrate it to you, whether you are a prospective buyer or not.
